Executive Summary

Milad Steel is a modern and fast-growing steel manufacturing company dedicated to delivering high-quality steel products for construction, infrastructure, and industrial applications. With a strong commitment to quality, safety, and customer satisfaction, Milad Steel aims to become one of the leading steel producers in the region. Our products are manufactured using advanced industrial systems and strict quality assurance procedures to ensure durability, reliability, and compliance with international standards.

Milad Steel is committed to supporting national economic development by increasing domestic production, reducing dependence on imported materials, and creating sustainable employment opportunities.

Company Background

Milad Steel Company was established to meet the growing demand for high-quality steel products in the construction and civil engineering sectors. The company, utilizing modern machinery and equipment along with a skilled and experienced workforce, specializes in the production of structural steel profiles, reinforcing bars, and customized steel components. The company was originally founded in **1400** under the name **Zia Saeedi** and in **1404**, the trade name was changed solely to **Milad Steel**, while ownership, management, and production standards have remained unchanged.

The company's strategy focuses on:

- Enhancing local steel production capacity
- Promoting self-reliance within the country
- Providing affordable, high-quality steel products
- Ensuring availability of steel for large-scale construction projects

Milad Steel

میلاد سٹیل

Our Mission

To produce high-quality steel products that are safe, reliable, and durable, supporting Afghanistan's construction, infrastructure, and industrial development while ensuring customer satisfaction.

Our Vision

To be a leading regional steel manufacturer, recognized for quality, innovation, and contribution to national economic growth.

Core Values

Quality Excellence – Delivering products that meet the highest standards.

Integrity & Transparency – Conducting business with honesty and professionalism.

Customer Focus – Meeting and exceeding client expectations.

Safety & Professionalism – Prioritizing workforce safety and ethical practices.

Innovation & Improvement – Continuously enhancing processes and products.

National Development – Supporting Afghanistan's industrial growth and prosperity.

Products & Services

Milad Steel manufactures a wide range of steel products for commercial, industrial, and construction use:

Structural Steel Profiles

Milad Steel manufactures a wide range of structural steel profiles designed to provide strength, stability, and reliability for construction and industrial applications. Our profiles are produced using modern rolling technology and strict quality control to ensure precision, durability, and compliance with industry standards.

Round Bar/Skewer

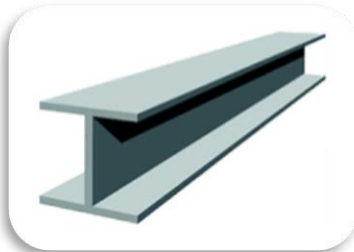

Round Bar/Skewer refers to a round steel bar or rod commonly used for support, reinforcement, and fabrication purposes. It provides strength and stability and is widely utilized in construction, metalwork, grills, frames, and various industrial assembly applications

H-Beams

H-Beams offer superior load-carrying capacity and structural stability. Their wide flanges make them ideal for heavy construction, bridges, high-rise buildings, and large industrial structures.

L-Angles

L-Angles are used for bracing, framing, and edge reinforcement. They provide strong corner support and are widely utilized in fabrication, construction, and industrial assembly work.

Structural Steel Profiles

Milad Steel manufactures a wide variety of structural steel profiles used in residential, commercial, and industrial construction projects. Our profiles are engineered for strength, durability, and dimensional accuracy.

Applications include:

- Steel frameworks and building structures
- Bridges and industrial sheds
- Warehouses and factories
- Infrastructure and utility projects

All structural profiles are produced to meet recognized national and international standards, ensuring long-term performance and safety.

Rebar & Steel Rods

We produce high-quality reinforcement bars (rebar) and steel rods in multiple diameters and grades to support reinforced concrete structures.

Key features:

- High tensile strength and flexibility
- Excellent bonding with concrete
- Resistance to stress and load conditions
- Suitable for seismic and heavy-load environments

Our rebar products are widely used in foundations, columns, beams, slabs, and large-scale infrastructure projects.

Customized Steel Manufacturing

Milad Steel provides customized steel manufacturing solutions tailored to specific project requirements. Our technical team works closely with clients to deliver precision-engineered steel products based on drawings, specifications, and performance needs.

Customization services include:

- Size and grade modifications
- Project-specific steel profiles
- Special orders for industrial applications
- Engineering and technical consultation
- This flexibility allows us to support both standard and complex projects efficiently.

Packaging & Delivery Services

We ensure safe, secure, and efficient packaging of all steel products to protect quality during transportation and storage. Our logistics and delivery services are designed to meet project timelines and customer requirements.

Services include:

- Secure bundling and labeling
- Damage-preventive packaging methods
- Timely delivery to project sites
- Nationwide distribution support

Our reliable delivery system helps clients maintain smooth project execution without delays.

Production Capacity

Milad Steel operates with a robust production capacity supported by modern machinery and optimized manufacturing processes. Our facilities are capable of meeting large-scale demand while maintaining consistent quality across all product lines.

Production strengths:

1. Continuous manufacturing capability
2. Ability to handle bulk and custom orders
3. Scalable output to support major projects
4. Efficient resource and energy utilization

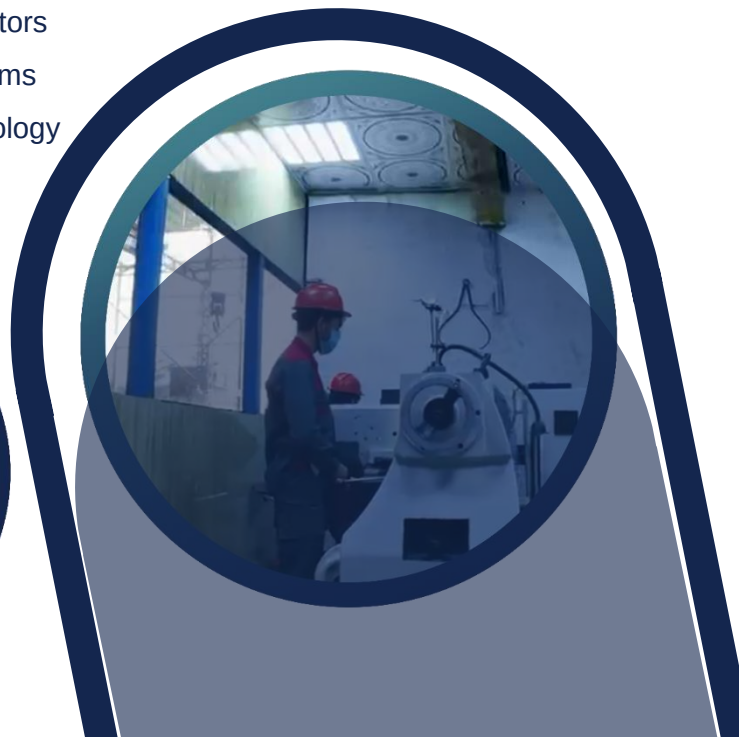

This capacity allows us to serve both domestic markets and future regional expansion.

Technical & Factory Facilities

Our factory is equipped with advanced production lines, testing equipment, and technical infrastructure to ensure precision and efficiency.

Facility highlights:

1. Modern steel rolling and forming machinery
2. In-house testing and inspection systems
3. Skilled engineers, technicians, and operators
4. Preventive maintenance and safety systems
5. Milad Steel continuously invests in technology upgrades to improve productivity, product quality, and operational safety.

Quality Assurance & Certification

Quality is a core principle at Milad Steel. We implement strict quality assurance procedures throughout the production cycle—from raw material inspection to final product delivery.

Quality practices include:

1. Compliance with recognized industry standards
2. Continuous monitoring and testing
3. Dimensional and mechanical property verification
4. Documentation and traceability of products

Our commitment to quality ensures that every product delivered meets performance, safety, and durability expectations.

Powering Progress With Strong Steel.

Certification & Quality Control

Milad Steel ensures all products meet required standards through strict quality control

Chemical Composition – Verification of material grade and consistency

Tensile Strength – Confirmation of strength and elongation properties

Bending Performance – Assurance of flexibility and durability

Impact Resistance – Evaluation of performance under stress

Dimensional & Visual Inspection – Accuracy of size and surface quality

All products are certified in accordance with recognized industry standards.
